Technical sheet

Voltage Detectors - Self Testing Audio/Visual

Marque: HONEYWELL

Ref Product: wire:4556-hw

Ref Mcmining: DETECTVOLT4556

Description	
	Salisburyâ€™s Self-Testing Voltage Detectors allow testing to be continuous and automatic. An intermittent flash and beep confirms the detector is functioning properly.
	Self-Testing Voltage Detectors are used to verify live or de-energized conductors. These testers may be used with rubber insulating gloves or hot sticks using the splined universal end fitting. Testers indicate the presence of voltage with an extra bright LED light and a distinctive audible signal. It is recommended that the tester be moved closer to the conductor until a warning is indicated, or it touches the conductor, apparatus, or elbow test point. Each tester requires three “C” batteries (included).
Technical specification	
Complete Kit	1-4544 Tester 240V to 230kV, 1-21517 Case, 1-2500 Shotgun Adapter
	Dimensions in. (mm): 11 x 3.5 (279.4 x 89)
Features and benefits	
	Voltage Detectors - Self Testing Audio/Visual Features and Benefits
	Do not assume conductors that have been tested de-energized will stay de-energized. Always install proper grounding devices before working. Failure to do so may result in serious injury or death.
