Faceshield - Front-Mount Faceshield Bracket

Marque: HONEYWELL

Ref Product: wire:CASFM70-FIBERMETAL

Ref Mcmining: CASFM70-FIBERMETAL

Description	
	This rugged, dual-channel Faceshield Bracket mounts on the front brim of a hard hat so the hat need not be worn in the reverse position.
	Fibre-MetalÂ® FM-70 is a lightweight, dielectric faceshield protective cap mounting bracket that mounts on the front peak of the cap. Dual channel mounting system uses one channel to anchor the bracket to the cap while the other channel holds the window so it can lock into the work position and pivot up and out of the way when not needed. The locked channels form a positive seal to keep debris from filtering between the cap and faceshield. Molded from strong, heat resistant Noryl, model FM-70 is ideal for extended outdoor use. Incorporates Fibre-Metal HIGH PERFORMANCE wide-vision windows.
Features and benefits	
	- One channel holds the window, locking into the work position with a unique snap-lock.
	- The other channel is anchored by a neoprene band.
	- The bracket allows the faceshield to form a positive seal to the cap, preventing debris from filtering through. Made of lightweight, dielectric thermoplastic.
	- Between uses, the faceshield may be pivoted above the cap.
	- SEI certified. **Note: Faceshields are sold separately.**
