Proto Classic Screwdriver 36 Piece Combo Set

Marque: PROTO

Ref Product: wire:J9900C

Ref Mcmining: PRJ9900C

Features and Benefits
• Designed to meet demanding heavy duty needs of industrial maintenance and assembly applications. • Screwdrivers meet ASME B107.15 standards. HANDLE • Impact resistant, extruded acetate handles are four-sided with broad but shallow flutes. • Resistant to most harsh chemicals (including hydraulic fluids used in the aerospace industry.) • Handles are comfortable and easy to hold. • Four sided handle design helps prevent “roll away” from the work surface. • Large handle size provides a strong grip for extra driving power. SHANK • High alloy steel shanks are heat treated their entire length to help provide strength against twisting action and to help prevent bending and twisting when placed under torque. • Fully grounded and chemically polished, then chrome plated for corrosion resistance. • Large round shanks include hex bolster for use with a wrench when added torque leverage is required. • Bars are securely anchored into transparent handles for long life. TIP • Made of high-alloy steel (same as Shank). • Precision machined for precise fastener fit. • Finished in black oxide to help prevent cam out and slipping. • Tips are un-plated with a black oxide finish to help prevent chrome peeling an important Foreign Object Debris (FOD) concern.
