1/4" Drive Universal Joint - 6 Point

Marque: PROTO

Ref Product: wire:J4770A

Ref Mcmining: PRJ4770A

Features and Benefits
• Replaces J4770. • Employs a pin system (versus screw) which connects the central block to the driving end and open end upgrading overall performance. • Proto® 6 Point Sockets are ideal for use on stubborn or damaged fasteners, and also on fasteners made from soft materials. • The TorquePlus™ design is a high performance drive configuration which allows for quick and easy socket engagement to the fastener flats, not the corners. • The TorquePlus™ configuration employs a radius-corner design, shifting contact area and stress away from the fastener corners and distributing contact stresses over a large area of the socket, minimizing slippage. • The TorquePlus™ internal design minimizes fastener rounding, helps to extend fastener life, and allows the user to more easily turn worn, rounded, or rusted fasteners.
Product Details
Weight: 0.04 lbs, 0.02 kilos Socket Length (L): 1-11/32" Socket Type: 6-Point Specifications: ASME B107.10M
