SOLAR STREET LIGHT

Marque: SOLAR STREET LIGHT

Ref Product: wire:SOLARSTREETLIGHT

Ref Mcmining:

Description	
LAMP STAND	6m,Q235 steel,The upper and lower diameters are 60mm/140mm, - the wall thickness is 3mm, the diameter is 60, and the flange is 260*260*10. - The whole hot-dip galvanizing, electrostatic spray plastic anti-corrosion treatment, including solar support, 20 years of quality assurance of corrosion and rust; (including embedded parts of reinforcement cage)
solar panels	12V/160W polysilicon solar panel, conversion efficiency is not less than 18%, the actual service life is 20 years
Lithium batteries and controllers	Capacity 12V/80AH, solar dedicated battery, service life in 5-8 years. - The controller is built into the lithium battery box, computer control, light control time control integrated, double output. - Overcharge and discharge and anti-reverse connection function, - waterproof coefficient IP65. The average life span is more than 5 years;
Lamp	Light source power 50WLED
Height	6m
	Turn on the light for 12 hours a day for 5-7 rainy days
