Technical sheet

Proto Miniature Long Nose Plier - 6-10/11"

Marque: PROTO

Ref Product: wire:J286LNXL

Ref Mcmining: PRJ286LNXL

Features and Benefits
• Small in size for delicate and fine work. • Made of quality alloy steel for long life. • High corrosion resistant finish with welding spatter resistance. • Precisely machined teeth for a positive grip and to help prevent slippage. • Locking mechanism helps leave both hands free when clamping, helping to eliminate squeezing action and general hand fatigue when manipulating. Also helps to save time in repetitive jobs. • Tip of release lever projects at end of handle for a safe, quick, no-pinch, powerful release especially when tools are firmly locked. • Spring loaded release lever is out of the way when handling. • Drop forged jaws and rugged tooth profile for durability and toughness. • Holes in mobile jaw are drilled and not press punched to ensure they are cylindrical to ensure maximum bearing with rivets. (Punched holes tend give poor bearing.) • Large diameter of rivets to help permit secure joints adding to the durability and robustness of the tools. • Piano wire spring for smooth and efficient jaw opening. • Jaw Hardness: 48-51 • Jaw Opening: 2-5/32" • Jaw Depth: 1-31/32" PROTO MINIATURE LONG NOSE PLIERS • Long slim jaw design allows accessibility into recessed areas. • For fine auto service jobs.
Product Details
Weight: 0.42 lbs, 0.19 kilos Jaw Width: 5/16" Overall Length: 6-10/11"
