Faceshield - Full frame assembly - 12cal per cm2 arc flash protection

Marque: HONEYWELL

Ref Product: wire:AS1200HAT

Ref Mcmining: CASAS1200HAT-SALIS

Description	
	12 cal/cm2, Arc Flash Protection Faceshield Unit w/ Hard Hat AS1200HAT Kits make your Personal Protective Equipment purchasing even easier. These convenient kits contain an AS1200HAT, a ATPV 12 cal/cm2 Kit , safety glasses and an ASBAG. The SKA kits are an ideal kit to use with PPE programs that exceed 8 cal/cm2 or with 8 cal/cm2 to 12 cal/cm2 ATPV rated coveralls and jackets. AS1200HAT ATPV rating of 12 cal/cm2, protection greater than 12 cal/cm2 cannot be achieved. Important : The maximum Arc Flash Protection of a kit is equal to the lowest cal/cm2 rating of any component in the selected safety kit.
	The AS1200HAT has an ATPV rating of 12cal/cm2 and utilizes nanotechnology to provide a clearer, more transparent window for improved visibility. The shield/window is designed to be easily replaced without tools. The faceshield unit includes ventilation ribs that allow a natural convection air flow through the top of the face shield. This reduces fogging of the visor, lowers CO2 levels and improves comfort for the user.
Optional Accessories	
	Optional accessories for the AS1200HAT include an anti-fog inner lens, attachable task lights, and transparent chin guard. The anti-fog inner lens includes an air spaced design that decreases fogging. The shield meets the ASTM requirements for an Anti-Fog Lens. On both sides of the faceshield is an easily adjustable flashlight clip which holds optional attachable task lights. With these optional task lights, the user is not inconvenienced with holding a flashlight while working. The AS12CLR Transparent Chin Guard dramatically increases the user's peripheral view by increasing visibility on the sides of the faceshield unit.
