COMBINATION FLEX HEAD WRENCH 1/2- 12 POINT

Marque: PROTO

Ref Product: wire:J1270-16

Ref Mcmining: PRJ1270-16

Specification:	- Satin finish provides corrosion resistance and a slip resistant grip. - 12 point box end allows for fine indexing, helping to improve speed and access. Fits 4, 6 and 12 point fasteners. - Use the swiveling box end to break or cinch bolts in difficult locations. - Heat-treated alloy steels produce a shank with high leverage. - Box ends incorporate the TorquePlus™ system. - Proto® TorquePlus™ wrenches are ideal for use on stubborn or damaged fasteners, and also on fasteners made from soft materials. - The TorquePlus™ design is a high performance drive configuration which allows for quick and easy wrench engagement to the fastener flats, not the corners. - The TorquePlus™ configuration employs a radius-corner design, shifting contact area and stress away from the fastener corners and distributing contact stresses over a large area of the socket end, minimizing slippage. - The TorquePlus™ internal design minimizes fastener rounding, helps to extend fastener life, and allows the user to more easily turn worn, rounded, or rusted fasteners.
Size:	J1270-16 - in. : 1/2" - Length : 7-3/4"
