Warning:

All items in the first aid kit must be in a fixed position, neatly arranged, clearly marked, and marked if possible.

2. The first aid kit should be checked regularly (every 3 months or half a year) to determine whether all items are well packaged, whether they have deteriorated or expired, and replaced and replenished in time as needed.

3.After the medicines in the first aid kit are used, the consumed items should be replenished in time for use in the next first aid.

4.The first aid kit should be placed in a conspicuous place and be sure to be taken out quickly when needed, so the first aid kit is generally not required to be locked.

5. When using the drugs in the first aid kit for first aid, be sure to identify the drugs and dosages used, and use them in strict accordance with the instructions to avoid misuse.
