Microporous Coverall

==WATER RESISTANT ==

==BREATHABLE==

==PROTECTIVE DISPOSABLE COVERALL==

PRODUCT DATA SHEET

These Coveralls are normally used for effective protection against fine particles, liquid splashes or fine liquid spray – effective depending on toxicity of chemicals and conditions of exposure. The Coveralls are strong, breathable and comfortable to wear.

The European Standard for Chemical Protective Clothing defines six protection types.

These are:-

- Type 1. Gas-tight clothing.
- Type 2. Non gas-tight clothing.
- Type 3. Liquid-tight clothing
- Type 4. Spray-tight clothing
- Type 5. Particle-tight clothing. (Meets EN13982-1)
- Type 6. Limited splash-tight clothing (Meets EN13034:2005)

These Coveralls meet the European Standards for protective clothing **Type 5 and Type 6.**

Typical Applications:

Effective against hazardous dry particles and low hazard liquid splashes or spray. Asbestos Handling / Removal, Food Processing, Pharmaceutical, Insulation, Pesticide Spraying or similar applications.

Limit of Liability:

The Manufacturer shall not accept responsibility for misuse of its product nor inappropriate conditions in which the product is used. These Coveralls are made of a two layer microporous laminated fabric. These Coveralls are not heat or fire resistant and should not be used for welding or similar applications, avoid such areas containing intense heat, sparks or bare flame and hot surfaces. It is also the user's responsibility to select combinations of appropriate garments and / or other protective garments in conjunction with this Coverall. Users must judge on how long the protective garment can be used. These Coveralls must be replaced if punctured, ripped, torn, and abraded or if any kind of damage is observed on the outer layer of the material. Discontinue use if chemical or fibre comes into contact with skin and take appropriate action immediately. The Manufacturer shall not accept any responsibility for use other than in conditions specified.
